

STEPHEN COOKE

Smart Business Systems
Kedron, Brisbane QLD

17 October, 2026

Dear Hiring Manager,

I am writing to apply for the Helpdesk and IT Support Technician position with Smart Business Systems.

I bring extensive hands-on IT experience across Windows, Linux, Microsoft 365, Windows Server, networking, hardware installation and technical troubleshooting, supported by a strong professional background in customer service and client relationship management.

My technical experience includes building and repairing computers, configuring network equipment, resolving hardware and software issues, and maintaining systems. I am also familiar with IT ticketing platforms, technical documentation and supporting users with varying levels of technical knowledge.

I particularly appreciate Smart Business Systems' emphasis on practical learning, teamwork and professional development. I am self-motivated, organised and comfortable working independently while collaborating with others to resolve technical challenges.

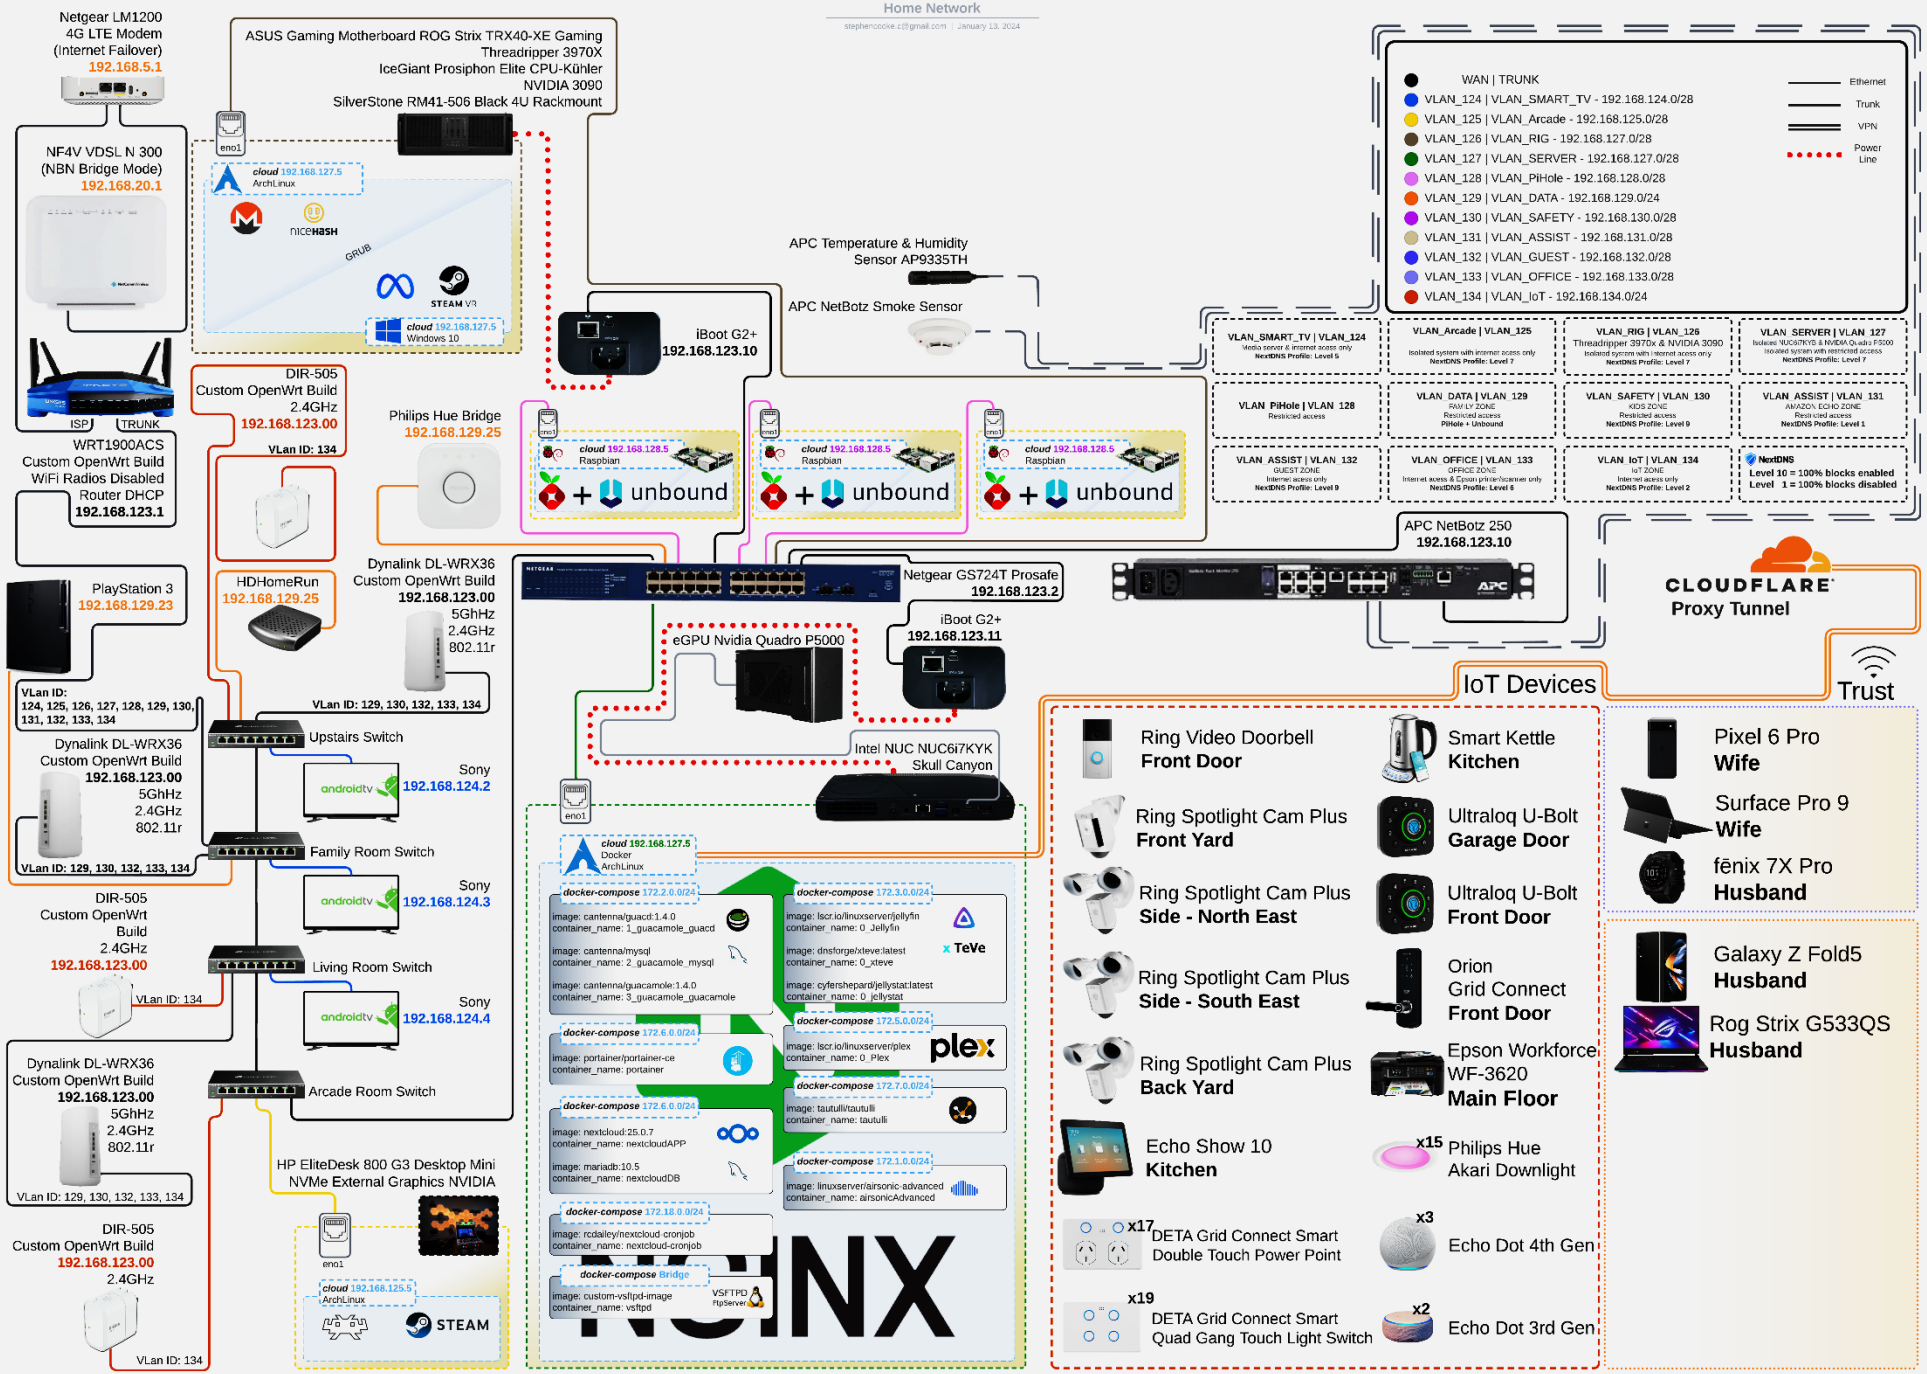

As an Australian citizen with unrestricted working rights, I would welcome the opportunity to relocate to Brisbane and contribute to your growing team.

Thank you for considering my application.

Kind regards,

Stephen Cooke
