Wednesday 31 July 2024 • 2:47 pm

Internet is fixed!!

Wednesday 31 July 2024 • 9:55 pm

Morning Steve, that's awesome to hear

Saturday 3 Aug 2024 • 10:27 am

Got it working!!

2 hrs ago

I have Entra connect working. Event viewer showed there was a mismatch in SSL

Saturday 3 Aug 2024 • 1:12 pm

Woo! Well done!

That absolutely explains... SSL Certs

Byron Makoney, Diam...

Woo! Well done!

That absolutely explains it! SSL Certs can be a pain but they're absolutely needed

Tuesday 6 Aug 2024 • 11:43 am

I was right, excessive writes are not a thing because there is no journaling.

With ext2 that is. Ext3 is when they introduced journaling

Tuesday 6 Aug 2024 • 1:50 pm

Ahh interesting! Did you know Microsoft had journaling in ntfs before Linux?

REALLY

Reading up on it now, lol

We should have I.T. trivia Friday at the office, Family Feud Style!

Starting with Network+...

Specifically  on ports and services. Something I need help with

Please insert a SIM card to continue

B

Byron Makoney, Diam...

Starting with Network+...

Specifically Common ports and services.... Something I need help with, lol

YES! I love the idea of IT trivia!

CIDR notation to subnet mask!!

I used to stick graphs everywhere for things like that. On the fridge, on the door next to the loo. Just got to keep looking at it again and again

Byron Makoney, Diamond IT

I used to stick graphs everywhere for things like that. On the fridge, on the door next to the loo. Just got to keep looking at it again and again

That's a great idea mate, going to get on that!

Oh that's easy once you look at it enough, just wait until you get to subletting and vlsm - k maths

Byron Makoney, Diam...

Oh that's easy once you look at it enough, just wait until you get to subletting and vlsm - binary maths

Subnetting*

I would ask strangest for 4 random numbers between 0 and 255 so I could practice on a pen and paper. It's intense

Me at the office tomorrow...

Hahaha thats the way!

<https://packetlife.net/library/cheat-sheets/>

That's mostly CISCO stuff, but the common ports and subletting ones will help

Thank you, really appreciate it!

Please insert a SIM card to continue

Byron Makoney, Diam...

That's mostly CISCO stuff, but the common ports and subletting ones will help

Thanks mate, really appreciate it!

Subnetting! Samsung keyboard isn't nerdy lol

No worries mate

It's a means to unload stress. The boys in game are like "..... this is your stress reliefer???"

😁 I'm glad to hear it, mate. awesome that you're loving it

I'm vibing to my music as I go at it

My creativity is taking flight

I thought about Linux the other day being used in windows and change my mind a bit , it is useful

I see purpose

It's to bridge gaps

To bridge learning

Micro\$oft learnt

They're trying to get the best on board

But is supposed to be a bit over an overlap to with docker

Please insert a SIM card to continue

B

Byron Makoney, Diam...

But is suppose a bit over an overlap to with docker

Huh?

And I'd probly prefer to use docker. Trying to think of a reasoned to run Linux in windows and then perhaps dock from that Linux instance?

Docker services, for the most part, there stripped to the bare metal debian/Ubuntu instances

Ahhh yeah the linux to bimbos delima

Linux to bimbos?

Yes Yes, it's an issue in thinking

Bimbos = windows hahaha

Okay, the classic stigma from a Linux perspective

Hahaha

Please insert a SIM card to continue

Byron Makoney, Diam...

So different but similar but different

I have to say, probably more so before I started at diamond it win server and Azure. Yes, it's certainly that windows experience. But, it's rock solid on the accounting front

Oooh shots fired!!!

But yes agreed

Accounting is amazing but logging isn't

Byron Makoney, Diamond IT
Accounting is amazing but logging isn't

It can be double edged in terms of security too I suppose

There is security o be gained by way of bare metal, read only, no log too

It's convoluted, logging that is, until you have enough experience

Frankly, it's a pain in the arse

Please insert a SIM card to continue

Byron Makoney, Diam...

It's convoluted, logging that is, until you have enough experience

Friday 16 Aug 2024 • 3:34 am

I've had a rough go, lol.

It's a nice place, but, there was some work involved. And I need to establish the it took bit to help.

Took = a

Or rather a = took

So the last few days 4hrs sleep at most. Should be able to return to normal over the next 24rs. It's hard because the kids arrived yesterday afternoon and I didn't have anywhere to put their clothes. But, I had purchased wardrobes. So, there I am building wardrobes.

I had to clean this place top to bottom. Every square inch has been cleaned by me with disinfectant wipes.

Remember the cleaning photo I sent you, well, that was cleaning the carpets because there was a smell... A

Please insert a SIM card to continue

B

Byron Makoney, Diam...

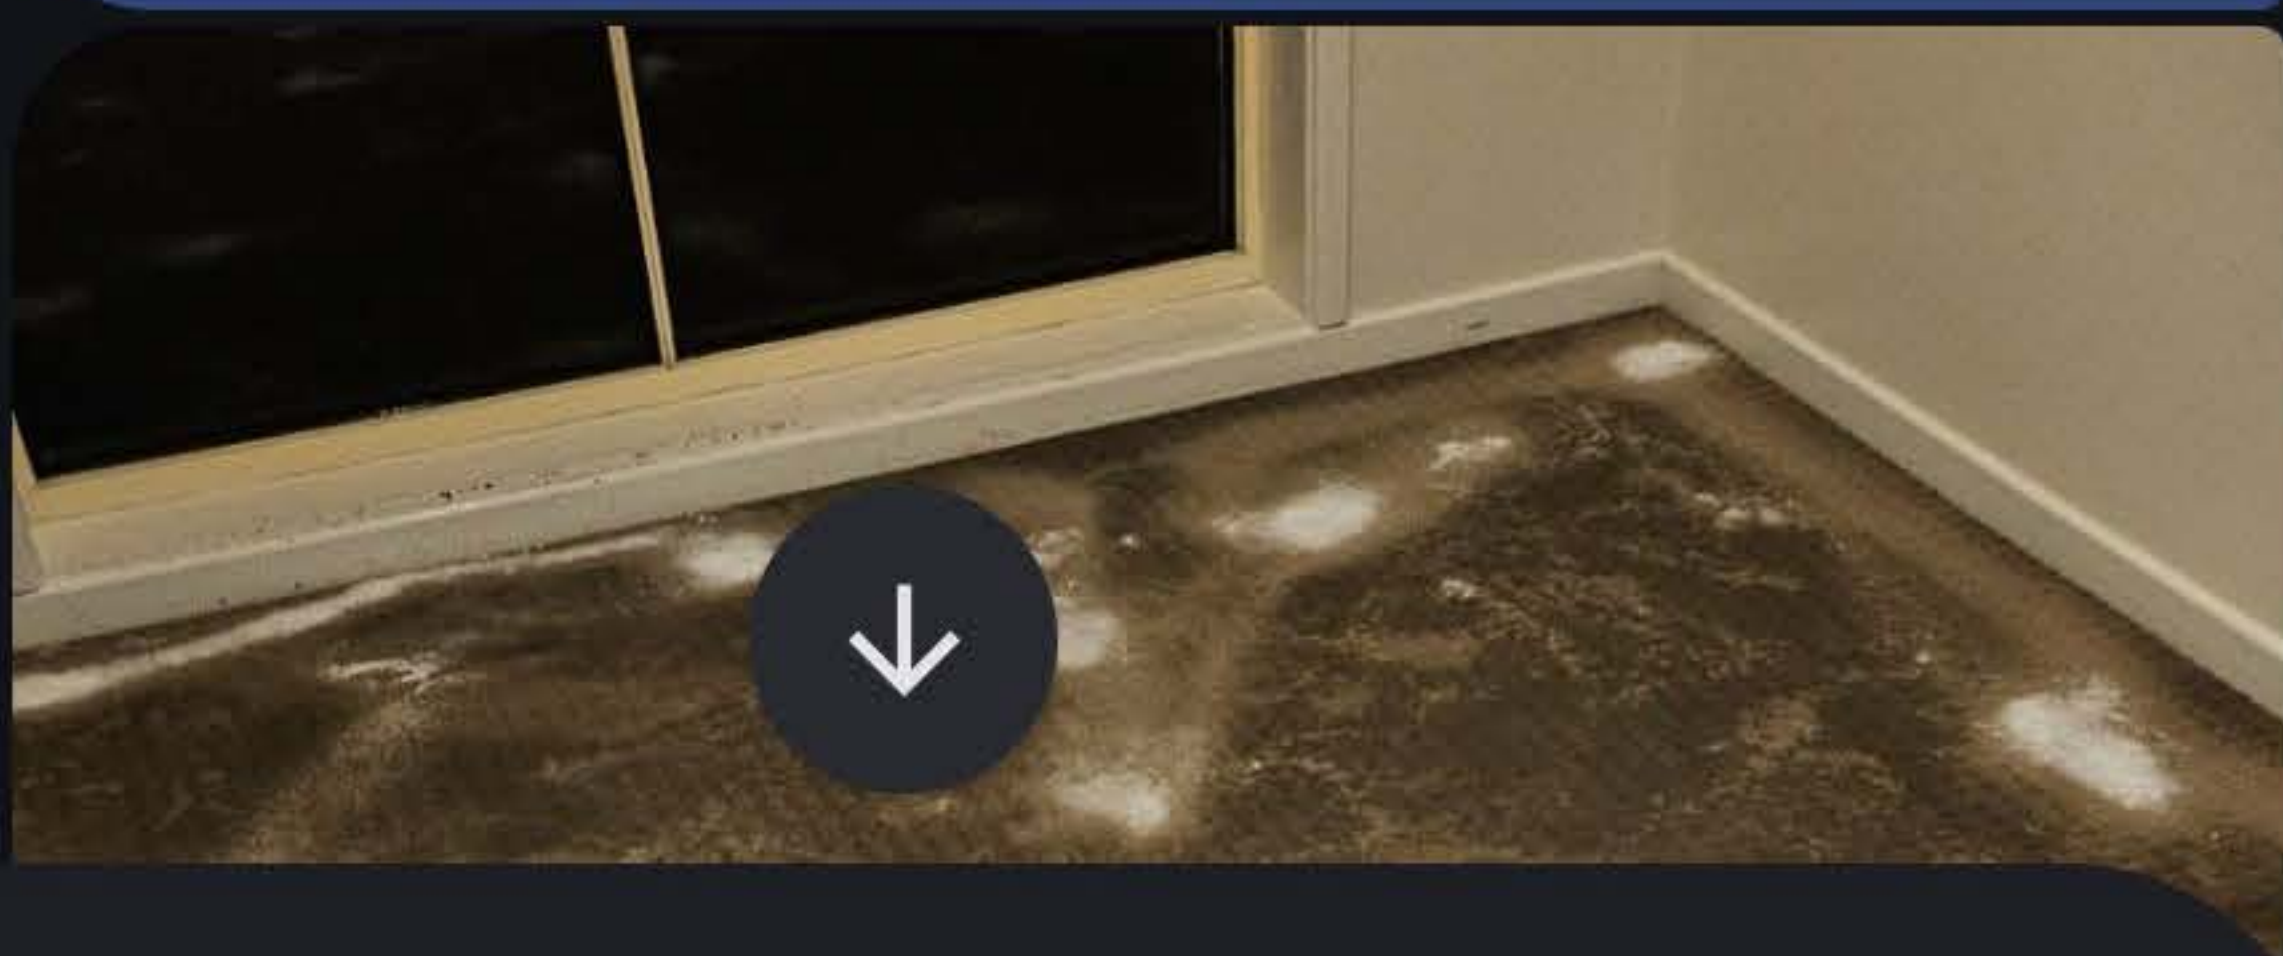

I had to clean this place top to bottom. Every square inch has been cleaned by me with disinfectant wipes.

Remember the cleaning photo I sent you, well, that's me cleaning the carpets because there was a smell... A terrible god awful smell in all of the bedrooms.

So I thought cleaned them with the Britex. 10 hrs later however, oh god, the smell returns!? I was felling oretty defeated at that stage. So I went to the shops. I am not embellishing when I say this, I purchase 60 bottles of cleaning vinegar and a ton of of other cleaning products and went as far as you can possibly go before having to resort to incineration!

....and I'm happy to report, the smell, Ive defeated the smell 100%

Please insert a SIM card to continue

B

Byron Makoney, Diam...

And as I suspected (as I cleaned the place very, very thoroughly...)
Neighbour tells me, two dog owner before me... Which isn't itself an issue, Ive been a dog owner myself.

But I'm pretty sure, this dog was not house trained. I'd even go as far to suggest the previous owner wasn't

And as I suspected (as I cleaned the place very, very thoroughly...)
Neighbour tells me, two dog owner before me... Which isn't itself an issue, Ive been a dog owner myself.

But I'm pretty sure, this dog was not house trained. Hell, Id even go as far to suggest the previous owner wasn't house trained, LOL.

Either that, or a proper flooding that hadn't been tended too properly afterwards.

The win for me is the kids haven't even mentioned there being a bad smell at all, just that it smells clean.

... Then my movers....a discrepancy as to wether or not packing of small items such as plates, cutlet, etc to be included. So, as I'm very much at a disadvantage, I decide not to press the issue and just role with there instruction, to only move large items.

Still took 8-9 hrs.

... Then my movers....a discrepancy as to whether or not packing of small items such as plates, cutlet, etc to be included. So, as I'm very much at a disadvantage, I decide not to press the issue and just role with there instruction, to only move large items.

Still took 8-9 hrs.

Meanwhile I have to deep clean the new place and also clean the old as the formal marital home is due to settle on August 23.

I could have returned to work yesterday or today but I made the decision to sort this out and roll out the laas, paas and SaaS because the thing im in need of most atm is more time and obviously in the absence of these services, my time is much more limited.

Need to be fully present when I'm at Diamond to get the most out of my time there. I also think it reflects poorly on me to go into the office and frequently have step out to make phone calls regarding no work related work stuff like finding a residence

B

Byron Makoney, Diam...

I keep finding new tech to buy 😞

<https://www.skycomp.com.au/icy-box-ib-3640su3-external-4-bay-jbod-external-hard-drive-enclosure-for-35-sata-hdds-400210.html>

Byron Makoney, Diamond IT

Yep you're right, next host is awesome, could build a budget web hosting business for small businesses from it

Exactly but most importantly, being an it guy, I see it is expected to have a portfolio of works accessible on the internet, what greater way than a self hosted next cloud instance right?

Exactly, it got me thinking, a vm for file storage, that's nice. But 256gb isn't going to cut it hahaha

Keep your eyes on Amazon for nvme and external SSD. And be sure to change from Australia store to the USA store, they have substantial discounts periodically on this type of stuff.

Please insert a SIM card to continue

Sometimes I'm able to take advantage of deals on eBay as well

Byron Makoney, Diamond IT
Exactly, it got me thinking, a vm for file storage, that's nice. But 256gb isn't going to cut it hahaha

Oh right, yes that's it, Nextcloud also allows you to mount local storage, so, you don't necessarily have to cram all the content into the Nextcloud instance itself and it's best to segment accordingly (makes backup and restore quicker and less of a footprint)

user is unawares

Please insert a SIM card to continue

B

Byron Makoney, Diam...

user is unawares

Frontend rather presents the same

And for the content that should be database managed like PDFs etc, that small chips

Its the integration into Microsoft and document collaboration and file sync and share that really drew my attention - could build one drive with good docs features for small offices

Google docs*

All run from a HP mini pc and a hdd enclosure hahaha

Also jbod, that's something I have seen till researching now.

<https://www.seagate.com/au/en/blog/jbod-vs-raid-for-data-centers/#:~:text=RAID%20is%20a%20mature%2C%20highly,systems%20that%20provide%20data%20defense.>

Right. That I've played around with as well but ended up abandoning it due to

Please insert a SIM card to continue

There's a few options and the best option needs

It can certainly be done

Best hosted on a Linux container too
tbh

You need to  a locker too or equivalent

Please insert a SIM card to continue

B

Byron Makoney, Diam...

You need to use docker too or equivalent

Run services as diff users

With nextcloud their ms integration, file sync and collaboration stuff are paid extras 🙄 but could be use full, yeah I've been using open office for years and years

Docker is something that I'm aware of, but haven't used yet

Hence the hp machine! Testing all the new things

Byron Makoney, Diamond IT

With nextcloud their ms integration, file sync and collaboration stuff are paid extras 🙄 but could be use full, yeah I've been using open office for years and years

Typically anything they offer as paid is available for self deployment for free too

Yeah I figured someone somewhere would be upset about paying for

Please insert a SIM card to continue

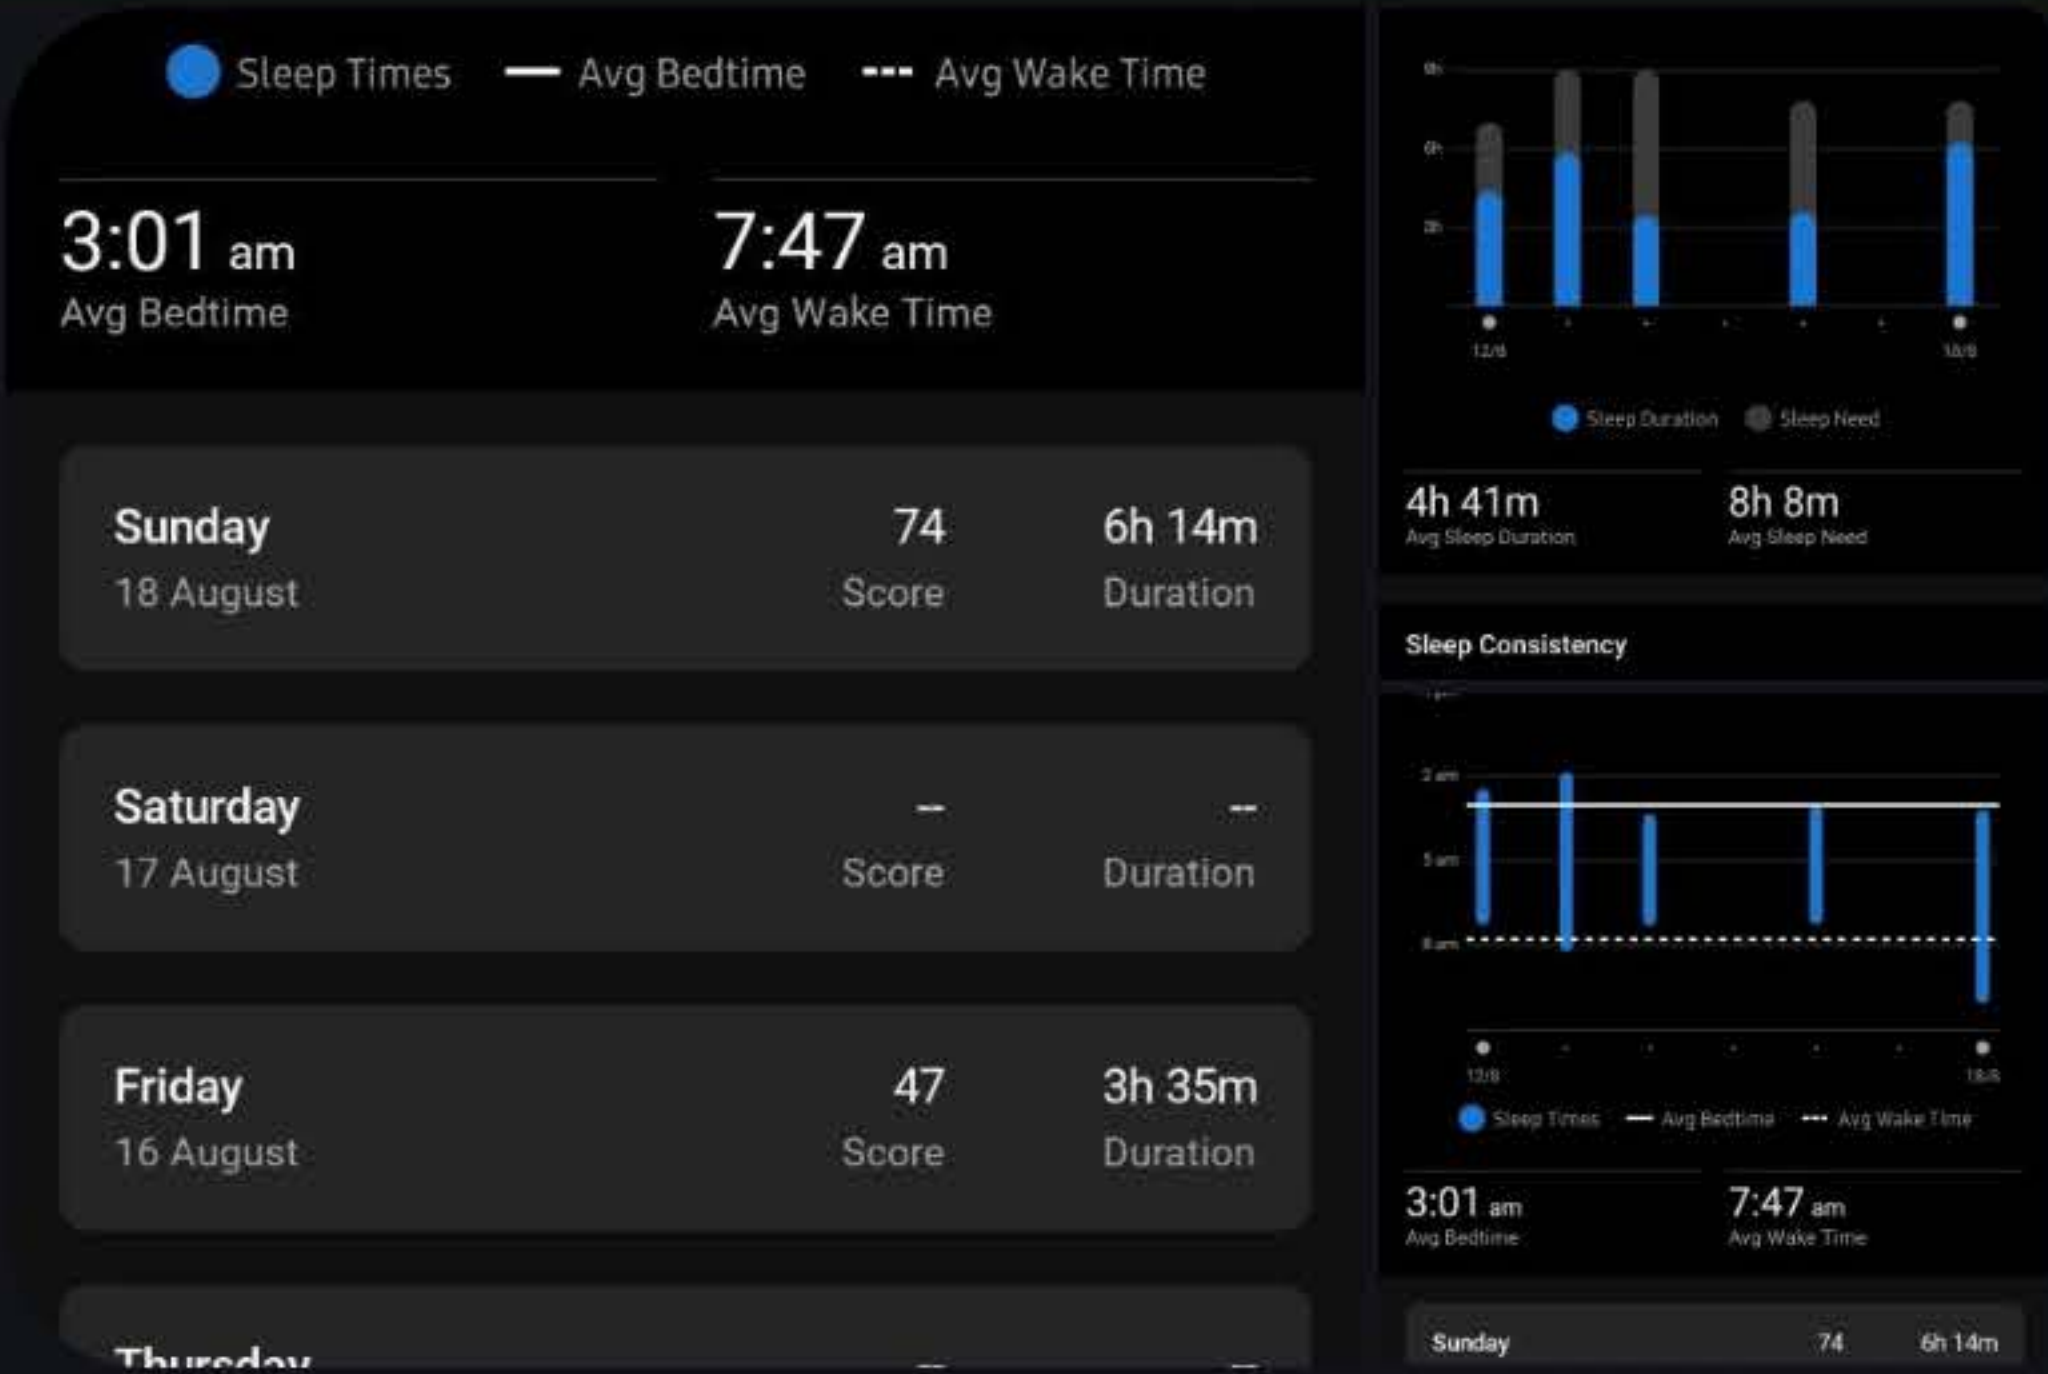

Yeah I figured someone somewhere would be upset about paying for features on an open source project 😂

Lucky I'm looking into this now, the storage pool on the snap is .2tb!

So im playing with clonezilla, had a simple issue that turning off secure boot solved. Just wondering if it's possible to clone a disk to a different partition on the same usb as clonezilla? I'm assuming a fat32 partition would work. Definitely want to keep this win11, it's pro so I could use in building a small domain environment

Nah never mind, too easy haha. Made an ntfs part, ran it in ram, ez pz

You ok there mate? Hope you've just forgot to charge your phone

Sooo much work...

Sooo much work...

+2

Good on ya mate, see you. Kicking arse

Byron Makoney, Diam...

Good on ya mate, see I told you. Kicking arse

Friday 23 Aug 2024 • 3:59 pm

Where's my head at, I remember now, NGINX!! Just came to me while having a coffee

We were talking the other day about dealing with domain names and forwarding to slightly different domain, NGINX

Did you get your new toys?

Saturday 24 Aug 2024 • 12:01 am

Morning mate! Coffee at 10pm, no wonder your sleeping hahaha

Oooooohh yeah of course, I was told it was hosted on iss but moved off to 'the cloud', so if it was hosted on nginx and using its own dns records that would explain the issues here, web dev made a change and fucked everything

Saturday 24 Aug 2024 • 6:14 am

Still coming today?

Yes

Saturday 24 Aug 2024 • 8:10 am

What time you expect to be there for?

About 4ish, dinner afterwards?

Sure

Awesome!

Saturday 24 Aug 2024 • 9:53 am

Hey mate, just in front  the cinema vaping

Hey mate, just in front of the cinema
vaping

Byron Makoney, Diamond IT
Hey mate, just in front of the cinema vaping

Okay

New place

I'm here did I miss you?

In E16

Did I book the wong seat?

Sunday 25 Aug 2024 • 5:58 am

Finally feel like I got some rest last
night.

I was really tired yesterday at and after
the movies...

I can function with little sleep but basic
only

B

Byron Makoney, Diam...

I can function with little sleep but basic only

Hey mate, glad to hear that had a good rest, how many hours?

I've been killing it, configuring nextcloud in the cli of a rocky kvm

Oh and washing

This is the same switch they have in the lab I noticed

I've told Allen as such

Anyways, this is what I'm up to ATM, resurrection of Frankenstein!!

Thus is me cleaning up btw

Oooh nice

Byron Makoney, Diam...

Oooh nice

Here's a better photo of model number

Byron Makoney, Diamond IT

Hey mate, glad to hear that had a good rest,
how many hours?

7

Very nice switch, beats my 5 port
netgear haha

Used off of eBay for 90.00 or 100

Brain is all kinds of Linux moosh.

Network bridge done, ↓ or next
cloud done, half way through

Brain is all kinds of Linux moosh.

Network bridge done, php for next
cloud done, half way through
configuration of Apache, almost up to
ssl certs

Sunday 25 Aug 2024 • 9:52 am

Nice 👍

Had a two hour nap lol

Thursday 29 Aug 2024 • 2:01 pm

Let's switch to Signal:
<https://signal.org/install>

Sms has silky animations ect ect, but
let's encrypt

Thursday 29 Aug 2024 • 4:47 pm

Haha

Haha

Friday 30 Aug 2024 • 12:29 pm

Sick today?

Friday 30 Aug 2024 • 1:41 pm

Yeah, had a spell of vomiting 🤢

So lots of water and watching nerdy stuff on the projector laying in bed

He's one smart cookie!

I have a Threadripper. I was using it in the server. I'm thinking of migrating it however to a workstation and get into YouTube content creation, etc.

Oh yeah?? Going to be a tech tuber?

Byron Makoney, Diamond IT
Oh yeah?? Going to be a tech tuber?

Perhaps. Perhaps inline skating as well.

Saturday 31 Aug 2024 • 2:58 am

That would be fun! Using something like a gopro?

Just found a second project for the kvm machine that I'll setup once I've finished next cloud. [Netboot.xyz](https://netboot.xyz) a network pxe boot environment, installing

Byron Makoney, Diamond IT

Just found a second project for the kvm machine that I'll setup once I've finished next cloud. Netboot.xyz, it's a network pxe boot environment, so installing Linux and Window...

Very cool. But, personally, I don't think I'd ever use net boot unless I had full control over endpoints and anti-tapering measures in place

Which is achievable. Definitely only via OpenVPN at minimum

Linux would be far safer IMO for implementation of safety measures

I already have ideas in this respect

Which I'm su  gn more of less with how it's being done with the Fortigate

B

Byron Makoney, Diam...

just doesn't see much of a point out the house, although, perhaps would be good for my Pi's and DNS. but, it would very much have to be a quashfs with hash check and it would be a custom predefined fully setup image already

It would also need to be serviceable. Perhaps private GitHub repo, publish changes, autobuild squashes image to remote boot location

If it isn't ultimately resulting in less work than it ain't worth pursuing so automation of builds and security given by transparency would be a must.

Jesus mate hope that you're alright

Byron Makoney, Diamond IT
Jesus mate hope that you're alright

I'm good

You won't be able to tell

Just right thing a bit stiff. Couple of weeks off the ... couldn't hurt either, lol

Byron Makoney, Diam...

Just right things a bit stiff. Couple of weeks off th skates couldn't hurt either, lol

It's the recovery tools that interest me the most, and you can use live boots of linux, which is pretty cool. Plus it saves the hassle of formatting usbs

Glad to hear you're alright

Tuesday 3 Sept 2024 • 1:01 pm

So that GS724T I gave you, figure it out yet? It's a V4 if it helps.

What through me for a loop when I first go it, upload=download and download=upload

Threw

Weren't we going to transition to Signal?

10 pack of 2.5 cat6 for 74 bucks

Yeah sure man, I sent an invite

Byron Makoney, Diamond IT
Yeah sure man, I sent an invite

You didn't want to do Telegram?

Telegram?

Bad joke

Oh lol

I can't find the invite

Please insert a SIM card to continue

B

Byron Makoney, Diam...

Telegram?

Bad joke

Oh lol

I can't find the invite

I was like, never heard of that app

Oh really? Used to use it all the time back when I was into rooting android devices

It's essentially the source these days for ROMs but with a XDA developers store front

I'll pretend to know what that is 🤔
