Greetings Lloyd,

I trust this email finds you well. I'm Stephen Cooke, referred to by Dan, expressing my interest in IT opportunities.

I bring a robust background in software and hardware customization, with expertise in deploying and managing docker services, SSL certificate configuration, Nginx reverse proxy setup, Cloudflare integration, custom kernel/firmware compilation (linux), and architecting IT solutions / constructing IT systems. Beyond technical skills, I actively contribute to open-source projects, emphasizing cybersecurity awareness.

I'm eager to contribute my skills and enthusiasm to a dynamic IT environment. I look forward to discussing potential opportunities further.

Regards,

Stephen Cooke
